#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

This is the first office action on the merits of application SN 10/579,476.

### ***Specification***

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: As best understood, the claim term nervures should be present in the specification and also the phrase “Means of safe”, “means accessories”, and “complementary form fixation” .

### ***Claim Objections***

1. Claims 9-14 are objected to because of the following informalities: They depend from claim 1 which has been canceled, for examination purposes they are assumed to depend from claim 8. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 8-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claim terminology does not appear to have any relation to the text of the specification and therefore since the examiner does not understand what the applicant is claiming, the examiner is under the impression that the applicant did not have possession of the claimed invention.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 8-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

#### ***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,078,360 to Sepera. As best understood from the drawings and as cited as an x

reference in the international search report. Sepera teaches structure that is a formwork to mold concrete. The panel has vertical and horizontal reinforcement.

9. Claims 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 2,535,277 to Fama. As best understood, Fama teaches a form for use in forming concrete for buildings. The panel has a vertical support (3) and horizontal rods (23). As seen in figures 8-10, the forms can be used to create corners. Pins (8) connect adjacent panels.

10. Claims 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 2,151,210 to Jennings. As best understood, Jennings teaches a form for use in forming concrete for buildings. The panel has a vertical support (15) and horizontal rods (15). Pins (21) connect adjacent panels.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TIMOTHY M. AYRES whose telephone number is (571)272-8299. The examiner can normally be reached on MON-THU 8:00 - 5:00.
